SAM H. BOBER'S

1943 Fair Price Catalog of Hardest and Best Yielding
Field and Garden Seeds
NEWELL, SOUTH DAKOTA

...so this World will be a Better Place to Live

Mrs. Bober and Russian farm woman, near Kharkov, where we visited in 1939 in search of new hardy seed.

From Germany to Japan, from Norway to the Sahara, the bombs are dropping . . . on towns, on ships, on factories . . . not to kill for the sake of killing, but to put an end to killing; to stop hunger, suffering and want . . . to make this world a better place to live.

That's why your son and my son are fighting in this war.

And here at home, in a less dramatic way, of course, we are carrying on with our efforts to make two blades of grass, two kernels of grain, or two ears of corn grow where one grew before.

In war, as in peace, we are still at the task of finding new and better yielding varieties of forage and grain to grow more food with less labor, less effort. For we sincerely believe that this, too, is vitally necessary so this world may be a better place to live.

Order the alfalfa seed, pasture mixtures or seed grain with the assurance that we will supply you the best yielding, most drought resistant and hardiest seed; seed that is free from any foul weeds and complies with the Federal Seed Law and the laws of your state.

Sincerely yours,

SAM H. BOBER

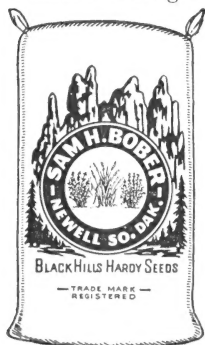

SAM, HIMSELF

TERMS OF SALE AND SHIPMENT

Payment: Cash in full with order. Money order, bank draft or check on good bank. We ship promptly on receipt of your order. All items are priced f.o.b. Newell except garden seeds, which are prepaid. Or you may send us a down payment of one-fourth the amount of the order and we will hold the seed for later shipment.

Newell is in Butte County, on the northern foothills of the Black Hills, about 3,000 feet above sea level, about 30 miles from Montana line. We ship on the C., N. W. and Milwaukee Railroads and with the Buckingham and Wilson Trucking Companies, and connecting with other lines.

PLEASE ORDER ALL SEED GRAIN AT ONCE

Last year we were unable to fill 237 late orders for New Spartan Barley, Winter Oats, Nakota Hulless Oats and the Bison Flax Seed. (1) **Help yourself** to better yields by ordering these seeds real early for early planting; (2) **Help Uncle Sam** by shipments in midwinter instead of crowding transportation in the spring; (3) **Help us** by letting us fill your order for all seeds in midwinter when help is easier to get. **YOUR CO-OPERATION WILL BE APPRECIATED.**

Sam Says: Save by Buying Direct at Bober's. Northern Grown FARM SEEDS at LOWEST Fair Prices.

Ten Reasons Why You Should Plant PROF. HANSEN'S SIBERIAN COSSACK ALFALFA

Grows in Every State in the Union

1. It is the hardest alfalfa known; 2. A better soil builder than other alfalfa; 3. More drought resistant; 4. Will make a big crop of hay in a dry season when others fail; 5. Has a double root system, both branched and deep; 6. Makes finer quality hay; 7. Will yield more hay per acre no matter what the weather conditions are; 8. Freezing does not kill young plants, neither does it kill or injure the growing hay; 9. Requires less seed per acre than other varieties; 10. Hogs do not kill it out in pastures, as they do other strains. **COSSACK, the World's Finest Alfalfa.** Purity 99.5 per cent; 90 per cent or more live seed. Dollar for dollar your best alfalfa buy.

10 lbs. \$4.65; 30 lbs. \$13.35; 60 lbs. \$26.40; 100 lbs. \$43.50

One of the large fields of Cossack alfalfa from our seed, on the Bones Stock Farm, Parker, S. D. Mr. Bones writes, "Your Cossack alfalfa not only yields the most per acre but dries better, preserves the leaves and makes the most wonderful hay."

LADAK ALFALFA

Originated in the very high mountainous section of India. It has proved very hardy and drought resistant and it is also wilt resistant. The supply of this seed is very limited. 99.5 per cent purity, 90 per cent or more live seed.

10 lbs. \$4.85; 30 lbs. \$13.90; 60 lbs. \$27.50; 100 lbs. \$45.50

LADAK AND COSSACK ALFALFA MIXED

For sections of country where wilt disease bothers alfalfa we recommend this mixture composed of half Ladak and half Cossack alfalfa for resistance to disease and at the same time high yielding ability of hardy alfalfa. 99.3 per cent purity, 90 per cent or more live seed. Fancy quality.

10 lbs. \$4.75; 30 lbs. \$13.65; 60 lbs. \$26.70; 100 lbs. \$44.60

FROM ONE OF OUR MANY ALFALFA CUSTOMERS

Dear Mr. Bober:

I am glad to state that the alfalfa seed we obtained from you has made the finest growth of alfalfa that I have ever seen. I have been growing this crop for a good many years, but I am frank to say that we have never obtained the results with alfalfa equivalent to that obtained from your seed. This is the reason we are using the seed again this year on an increasing number of properties, including one farm in Mississippi, the order for which you have probably received by this time.

Very truly yours,
D. Howard Doane.

BLACK HILLS IMPROVED GRIMM ALFALFA

Improved through selection and breeding by Prof. Wheeler and Dillman on the Government Station here and at Brookings. This Grimm alfalfa shows a decided superiority over the parent stock. 99 per cent purity, 90 per cent or better live seed.

10 lbs. \$4.45; 30 lbs. \$13.00; 60 lbs. \$25.65; 100 lbs. \$42.50.

DAKOTA NO. 12 ALFALFA

A native of the dry land in the Black Hills of Dakota. More drought resistant, hardier and better yielding than ordinary northwestern alfalfa. 99 per cent pure, free from noxious weeds. 90 per cent live seed.

10 lbs. \$4.40; 60 lbs. \$24.75; 100 lbs. \$41.00

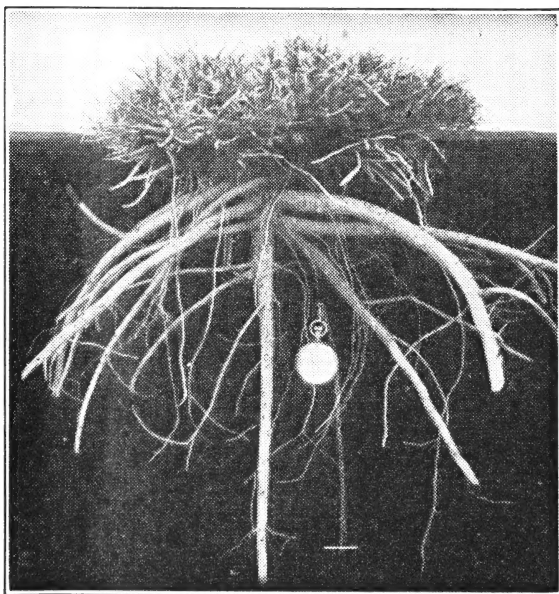

FARM BELT ALFALFA

A mixture of Cossack, Grimm, and Common alfalfa seed not quite as bright colored or plump as the rest. Well cleaned, and will do everything for you that the higher priced seed will do. No noxious weed seeds. 98 per cent purity, 85 per cent live seed. There is a substantial saving in the price.

30 lbs. \$10.90; 60 lbs. \$21.30; 100 lbs. \$35.25

Former President and Mrs. Coolidge inspecting a dryland alfalfa field while on vacation here in 1927. Sam Bober's Hardy Alfalfa Seed is planted on the Coolidge farm in Vermont and our Cossack alfalfa is producing real well on President Roosevelt's Hyde Park farm in New York.

Showing double root system of three-year-old Cossack alfalfa, also the stooling habit above the crown, which makes bushier, finer stemmed and immense yields of quality hay.

FREE INOCULATION

of alfalfa seed if order is received before February 15th, with Legume-Aid bacteria, to help you secure a more productive field. After February 15th add 80c per 100 lbs. of alfalfa seed and we will inoculate the seed with Legume-Aid for you before shipment, so it will be ready to plant and will get a good start for you. The inoculation is good for six months from time of treatment.

WESTERN WHEATGRASS—King of the Grasses

Builds Beef and Mutton

The Year-Around Pasture Grass for Western Dry Land

A most drought resistant, year-around permanent pasture and hay plant. Unlike other grasses that die down in the fall with the first frost, this wonderful grass is not affected and furnishes pasture during winter months as well as in the spring and summer. It propagates by root stalks and once started will last a lifetime. Its feeding value is greater than most other grasses. Stands 120 degrees Fahrenheit in the summer and 40 below zero freezing in the winter without apparent injury. Prefers clay soils. Plant 12 pounds per acre on firm ground and cover lightly. **Plant by hand or by drill quite early in the spring.**

10 lbs. \$2.00; 25 lbs. \$4.50; 50 lbs. \$8.50; 100 lbs. \$16.00

The Wheatgrass plant is as nearly a perfectly balanced diet as can be found in one plant. A man can saddle up his horse in January, and go out to see his stock as contented as in June.

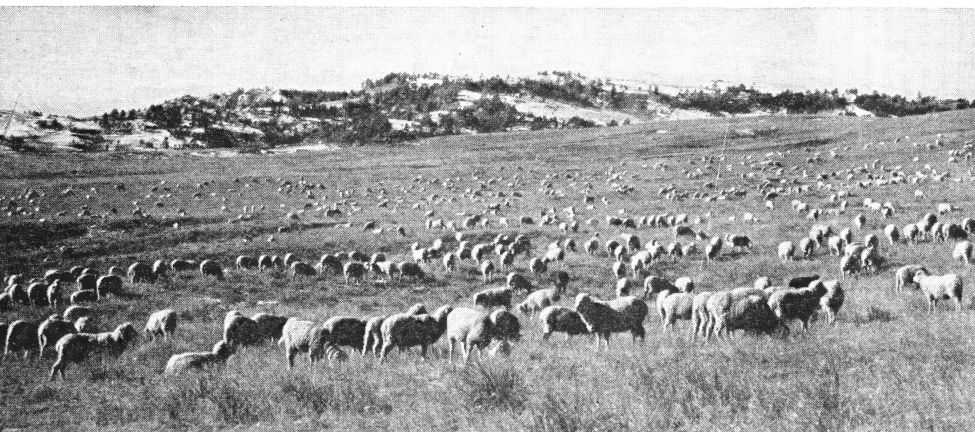

Photo by the Black Hills Studio

Wheatgrass is not only the most profitable for beef cattle but is also the best year round permanent pasture for production of wool and mutton

CRESTED WHEATGRASS

A drought resistant, long lived perennial bunch grass, related to Western Wheatgrass, introduced by Professor Hansen of S. D. State College who found it in Siberia, from where he also introduced Cossack Alfalfa. Stands extreme freezing in winter and hot dry temperature in summer without injury.

IMPROVED FORAGE TYPE of Crested Wheatgrass is finer stemmed and possesses 10 per cent more leaf and is definitely superior to the standard types. It becomes green in the spring earlier than other grasses and stays green later in the fall. It produces twice as much pasture and hay of high palatability and nutritive value as native grass. Produces twice as much beef, mutton and wool and shows no bad effect from heavy grazing. Broadcast 10 to 12 lbs. per acre. It has the ability to grow in low temperatures and starts growing earlier. Every farmer and rancher should plant this grass and do it early in the season. The very best top quality seed of the **heavier yielding Forage Type strain:**

10 lbs. \$2.25; 25 lbs. \$4.75; 50 lbs. \$9.00; 100 lbs. \$17.50

No. 1 grade Standard Crested Wheatgrass:

10 lbs. \$1.90; 25 lbs. \$4.00; 50 lbs. \$7.50; 100 lbs. \$14.25

ALL SEASON PERMANENT PASTURE AND MEADOW MIXTURE

A most practical life-long pasture and hay mixture composed of equal parts of Smooth Bromus grass, Cossack alfalfa, wheatgrass and ryegrass. Cattle and sheep are fond of it. Its great value is that it will grow well on poor land, but naturally the better the soil the better it will grow. **It has two to three times the carrying capacity of ordinary pastures.** It is most valuable in withstanding the most rigorous test of heavy grazing and yields heavy crops of hay, relished by, and highly nutritious for all livestock.

Here is a pasture that **comes up two weeks earlier every spring and stays green later in the fall than other pastures, and in winter months the wheatgrass part of the pasture can be grazed.**

This pasture mixture should be planted at the rate of 12 to 15 pounds per acre, about one-half inch deep, early in the spring on firm land; stubble land is good. Order early, we will ship promptly and you plant it early.

25 lbs. \$6.00; 50 lbs. \$11.75; 100 lbs. \$22.50

All Season Permanent Pasture is well adapted to alternate grazing. One-half is being pastured while the other half is growing up again.

PERMANENT HOG PASTURE MIXTURE

Earns AAA Payments

Permanent Hog Pasture Mixture contains the following mixed in the right proportion to produce the greatest feeding value:

Alfalfa.
Red Clover.
Alsike Clover.
Sweet Clover.

White Dutch Clover.
Domestic Rye Grass.
Bromus Inermis.
Timothy.

This mixture can be sown any time, from early spring until midsummer, and does not require any particular kind of soil, in fact, any soil that produces crops of small grain or corn, will answer the purpose. Because of the large amount of clover and alfalfa it contains, it serves the double purpose of providing the hogs with pasture of high feeding value, and building up the soil at the same time. Sow 15 to 20 lbs. per acre.

25 lbs. \$5.75; 50 lbs. \$11.25; 100 lbs. \$22.00

War requires tremendous increases in meats and dairy products, and the foundation of such production is pasture.

DRY LAND Permanent PASTURE MIXTURES

High altitude seed produced from the hardiest known strains, grown without irrigation. Well adapted to the inter-mountain region as well as lower country of the Western and Southwestern states.

NO. 1 PASTURE MIXTURE

4 lbs. Crested Wheatgrass
2 lbs. Western Wheatgrass
2 lbs. Domestic Ryegrass
2 lbs. Yellow Sweet Clover

25 lbs. \$4.25; 50 lbs. \$7.80;
100 lbs. \$15.00

NO. 2 PASTURE MIXTURE

2 lbs. Crested Wheatgrass
2 lbs. Western Wheatgrass
2 lbs. Grama Grass
2 lbs. Domestic Ryegrass
2 lbs. Yellow Sweet Clover

25 lbs. \$4.75; 40 lbs. \$8.80;
100 lbs. \$17.25

GROW QUICK PASTURE MIXTURE 2.50

25 Lbs.

A Popular Mixture at Reasonable Cost

Our Grow-Quick Mixture is a big seller. The cost of seeding is low and it gives quick production. You can begin pasturing it lightly within relatively few weeks after sowing.

Contains equal parts of Sweet Clover, Domestic Ryegrass, Timothy, Michels Hybrid Ryegrass.

Good quality seed is used and we mix it as thoroughly as we can so as to give you a fine value at low cost.

The Ryegrass and the Michels Hybrid Ryegrass in this combination are fast growers and afford the earliest feed. Meanwhile the Sweet Clover and Timothy are developing to increase its production and value. It keeps on growing until after frost. The Sweet Clover, Timothy and most of the Michels Hybrid Ryegrass of course live over winter and can be used the next year for plowing under, for continued pasture or cut for hay.

Sow 15 to 20 lbs. per acre. Sow about the time you sow small grain. Do not use a nurse crop.

50 lbs. \$4.75; 100 lbs. \$9.00, including bags

BROME and ALFALFA

I sincerely hope large numbers of our customers will sow a mixture of our Brome Grass and Alfalfa this year. It makes very heavy crops of hay that cure quicker than straight Alfalfa and is equal to it in feeding value. As a pasture it excels anything I know about. Both are very drought resistant. They supplement each other in a remarkable way. Pasture test for an average of three years, an acre of Brome-Alfalfa produced 3,933 pounds of milk and had an average of 145 pasture days. Straight Alfalfa produced 3,606 pounds of milk and provided 124 pasture days. In another test the mixture pastured by sheep gained 362 pounds per acre. Straight Alfalfa 309 pounds.

All cleaned seed. Sow about 16 lbs. of the mixture per acre.

\$25.50 per 100 lbs.; \$12.90 for 50 lbs.

Brome will thicken as Alfalfa thins, it will keep all the space occupied. Tests indicate there is little danger of bloat from this mixture.

PLANT BLUE GRAMA GRASS ON DRY RANGE

The wonderful short grass of the upland prairies. Only occasionally does it produce good seed crop, but we have a small supply of excellent seed this year. It is best scattered on the surface in the spring. Prices:

10 lbs. \$3.00; 25 lbs. \$7.00; 50 lbs. \$13.75; 100 lbs. \$27.00

MICHELS HYBRID RYE

Drought resistant, soil conserving

Produces succulent pasture, and good yields of grain

Michels Hybrid Rye, also known as Michels Grass, classed as rye by the U. S. Dept. of Agriculture, has proven its worth on most all kinds of soils from sections in California and Washington where rainfall exceeds 40 inches per year to semi-arid sections of Arizona, New Mexico, Texas, Kansas, Nebraska, Dakota and Colorado.

Michels Hybrid Rye is the fastest growing crop we know of for winter and early spring pasture. While the seed is hardly distinguishable from ordinary rye, the plant is more succulent, stools heavier, grows longer and livestock prefer it to other cereal forage.

In addition to furnishing very good pasture a field of Michels Hybrid Rye yields 20 to 50 bushels of No. 1 seed grain per acre depending on the season and soil. Our field of Michels Hybrid Rye is now in its third year production.

Our seed is from Registered stock from Idaho, originated by the Idaho University. It should be planted at the rate of 15 to 30 lbs. per acre on dry upland and 30 to 50 lbs. per acre where there is 30 inches or more of annual rainfall.

10 lbs. 85c; 25 lbs. \$1.60; 50 lbs. \$2.35; 100 lbs. \$5.25

BEST NORTHERN WHITE SWEET CLOVER SEED

10 lbs. \$1.50; 30 lbs. \$4.20; 60 lbs. \$7.80; 100 lbs. \$12.00

BEST NORTHERN YELLOW DWARF SWEET CLOVER

10 lbs. \$1.55; 30 lbs. \$4.35; 60 lbs. \$8.00; 100 lbs. \$12.50

NO. 2 WHITE AND YELLOW SWEET CLOVER SEED

\$9.50 per 100 lbs.

Good quality seed. Not as plump or quite as bright as No. 1 grade.

BEST NORTHERN SMOOTH BROME GRASS

Mountain grown, best yielding strain.

10 lbs. \$2.00; 25 lbs. \$4.60; 50 lbs. \$8.75; 100 lbs. \$17.00

QUALITY RED TOP GRASS SEED

10 lbs. \$1.90; 25 lbs. \$4.00; 50 lbs. \$7.50; 100 lbs. \$14.50

NORTHERN GROWN TIMOTHY SEED

10 lbs. \$1.40; 25 lbs. \$3.00; 50 lbs. \$5.75; 100 lbs. \$11.25

DOMESTIC RYEGRASS FOR EARLY PASTURE

10 lbs. \$1.50; 25 lbs. \$3.50; 50 lbs. \$6.00; 100 lbs. \$11.50

DWARF ESSEX RAPE SEED

For Sheep and Pig Pasture

5 lbs. \$1.25; 10 lbs. \$2.00; 25 lbs. \$4.15

ROSEN RYE

For Quick Pasture

For quick pasture, plant Rosen Rye early in the spring, a bushel and a half per acre. This will furnish pasture until about the latter part of July. For all summer pasture plant Grow Quick Pasture Mixture described on page 7, which will also furnish pasture the following year.

Rosen Rye: 1 bushel \$1.10; 5 bushels \$5.00; 10 bushels \$9.50

BEARDLESS BARLEY FOR HAY

1 bushel \$1.20; 5 bushels \$5.60; 10 bushels \$10.50, including bags

BARLEY THAT EVADES DROUGHT

NEW SPARTAN BARLEY

Ripens Ahead of Grasshoppers and Drought

The highest yielding, earliest maturing variety, a cross of Michigan barbless and two-row varieties, with strong straw which prevents lodging. It is smooth bearded, easier to handle and equals corn in feeding value.

You can plant it early in March because it is cold resistant. Ripens before hot and dry winds in July injure other varieties. A customer writes, "This seed did not cost me anything. The extra yield above the barley I had been using more than paid for the seed."

It made a record here in 1942 of 80 bushels per acre of the heaviest, most beautiful barley, weighing 56 lbs. to the bushel. The judges at the State Fair awarded it **FIRST PRIZE**. Order early and plant it early.

50 lbs. \$1.15; 100 lbs. \$2.05; 500 lbs. \$10.00, including bags

Winter Oats in shock on the 5,000 acre Bones Stock Farm, who buy all their field seeds from us

WINTER OATS

117 bushels per acre on dry land. This new introduction of earliest maturing oats yielded 30 or 50 per cent more oats per acre than the next best variety alongside of it. These oats are called Winter Oats because they are cold resistant but are planted quite early in the spring, making their growth during the most favorable moisture and weather conditions.

One customer writes, "We threshed all day but the shocks were so thick a fellow couldn't see we'd made any headway."

Any thinking man who can see, read, and count for himself will order these seed oats and order them real early.

3 bu. \$2.40; 5 bu. \$3.75; 10 bu. \$7.25, including bags

GOOD SEED WAS NEVER MORE IMPORTANT

America needs every ounce of the production of every farm. In this, our solemn obligation, we cannot, we dare not, trust to luck.

GOPHER OATS

A white seeded early maturing oat. About 10 days later than the Winter Oats. Farmers from eastern states order these oats from us year after year because these northern oats outyield their native varieties. Free from wild oats and other noxious weeds.

3 bu. \$2.25; 5 bu. \$3.50; 10 bu. \$6.85, including bags

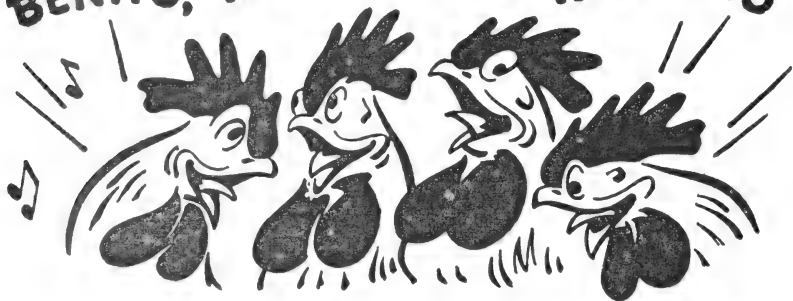

New Nakota HULLESS OATS

High Yields—No Waste—Finest Feed

Nakota is entirely hull-less, threshes easily, does not shatter, is medium early. It is both smut and rust resistant and produces **110 bushels per acre**. A bushel weighing 43 to 45 pounds. The high protein content, minus the objectionable hulls, makes it a perfect feed for promoting growth in humans, in poultry and in young animals. **SEED IS LIMITED.** Order early.

5 lbs. 50c; 10 lbs. 80c; 25 lbs. \$1.50; 50 lbs. \$2.75; 100 lbs. \$4.50

WE'LL EGG THE DAYLIGHTS OUT OF
BENITO, HITLER, AND HIROHITO

Prof. Hansen's PROSO GRAIN MILLET

Eggs are very close to the top of the list of food-for-victory items. Are your birds carrying their share of this extra production burden?

We'd like to see you try Prof. Hansen's Proso Grain Millet in your ration. This high protein feed is necessary for heavy production. It will keep your chickens healthy and will produce many more eggs.

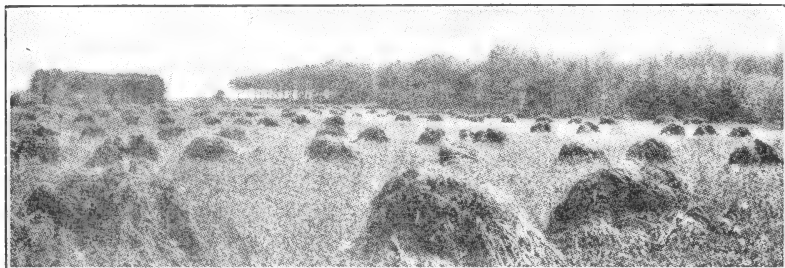

A Grain Crop in Sixty Days

This Russian introduction yields fifty to eighty bushels per acre. It takes only sixty or seventy days to mature a grain crop. This is one of the most versatile crops in the country and can be grown everywhere, on dry land and on irrigated land, low land or upland. It can be used for hay or mature for grain. It makes a wonderful chicken feed and it is also used for fattening turkeys and for milk, beef or pork production.

On dry land plant twenty pounds per acre, any time from May 1st to August 1st. In sections with better rainfall plant it at the rate of 30 lbs. per acre with a grain drill. Harvest the same as you do grain.

10 lbs. 60c; 25 lbs. \$1.00; 50 lbs. \$1.75; 100 lbs. \$3.25; 500 lbs. \$15.75

Mighty High in Goodness—Mighty Low in Price

A field of Proso that yielded 75 bushels of grain per acre

HAY MILLETS KURSK RUSSIAN MILLET

A very fine variety of millet, extremely hardy and withstands drouth. The plant shows a remarkable stooling habit, as many as 30 to 40 stalks frequently growing from one seed.

Prices: 50 lbs. \$2.15; 100 lbs. \$4.00; 300 lbs. \$11.50

WHITE WONDER AND GERMAN MILLET

A wonderful producer of hay and exceedingly valuable as a food for cattle and sheep. Like other millets it has a very low water requirement and is an excellent dry land crop. Produces 4 or 5 tons of hay per acre.

Prices: 50 lbs. \$2.00; 100 lbs. \$3.50; 300 lbs. \$10.00

BOBER'S SEED CORN

HYBRID SEED CORN

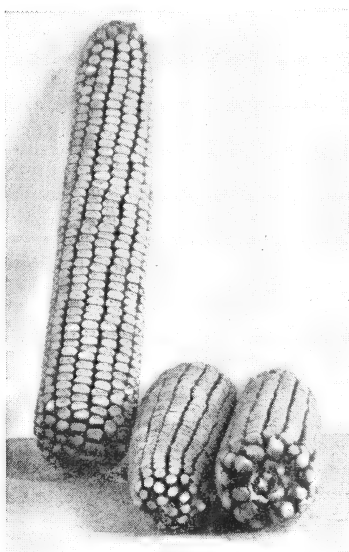

Yields 20 to 50 per cent more per acre than any other corn we have tried. It is the **hadiest and most drought-resistant** of all **Certified Hybrids**, with the widest adaptability. Produces good corn under adverse conditions. Best graded uniform flat grain.

½ bu. \$3.50; 1 bu. \$6.75; 5 bu. \$32.50

Save \$1 to \$3 per bu. by buying direct from us

DUST YOUR SEED CORN WITH NEW IMPROVED SEMESAN JR.

To increase the yield from three to five bushels per acre and for insurance against disease and unfavorable weather. 85c per lb.—will treat seed corn for 35 acres.

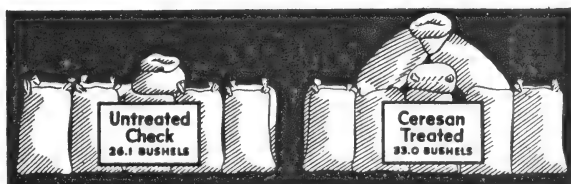

Hybrid Corn

NEW IMPROVED CERESAN

Checks seed rotting, reduces seedling blight. Controls stinking smut. Increases the yield of wheat, oats, barley and cane, milo and flax.

**80c per lb.,
treats 32 bushels**

Bober's Tested Corn GROWS, YIELDS and MATURES

Uncle Sam Needs More BEANS for the Army and the Navy

Beans are a good cash crop any time. A real money maker in war time.

GREAT NORTHERN BEANS

Resemble the Pinto in size and shape. Are in great demand for winter use, and will give satisfaction on either dry or irrigated land. Beans are larger than the common navy and are more palatable.

10 lbs. \$1.20; 25 lbs. \$2.50; 50 lbs. \$4.25; 100 lbs. \$7.75

PINTO BEANS

Are the leading commercial beans of the West. Pinto Beans will grow on dry land, yielding as high as 1,100 pounds per acre. Are easy to grow and require little attention. There is now an established demand from eastern and southern markets.

10 lbs. \$1.20; 25 lbs. \$2.50; 50 lbs. \$4.25; 100 lbs. \$7.75

NEW IMPROVED TEPARY WHITE BEANS

Yield More than Soybeans

The highest yielding, earliest maturing selection by the U. S. Experiment Station at Redfield, S. D. A bushy plant with seeds similar to the navy bean but smaller in size. In actual tests at the Government Station it outyielded other varieties of beans and soybeans. The straw may be fed to livestock with profit. These beans were awarded First Prize at our State Fair, and won a prize at the International the year before.

10 lbs. \$1.20; 25 lbs. \$2.50; 50 lbs. \$4.25; 100 lbs. \$7.75

Sudan Grass

SUDAN GRASS

Grows Quickly—3 to 4 Tons Hay from One Cutting

Sudan grass grows rapidly and thrives in the hot dry months when other pastures are least productive. Especially valuable as a supplementary pasture to provide an abundance of feed of good quality during that period of the summer when it is most needed.

Will grow on almost every class of soil. Stock of all kinds eat it greedily. On dry upland plant at the rate of 12 pounds of seed per acre. On better land 15 to 25 pounds of seed per acre. Plant when the soil is fully warmed up.

25 lbs. \$1.35; 50 lbs. \$2.25; 100 lbs. \$4.25; 300 lbs. \$12.25

Uncle Sam Asks for **MORE FLAX**

Today, flax holds a position of importance in the war program. Everything from gunstocks to battleships requires finishes — paints, varnishes, and the like. Vast quantities are also necessary for commercial purposes.

Plant BISON Flax — the highest yielding rust and wilt resistant variety for a cash crop.

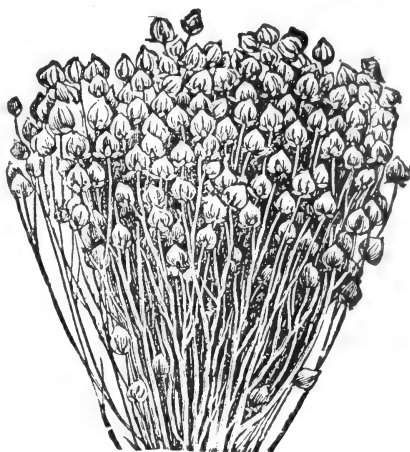

1 bu. \$3.40; 5 bu. \$16.50; 10 bu. \$32.00 including bags

Flax is the very best nurse crop for alfalfa and grass seed. Plant $\frac{1}{3}$ to $\frac{1}{2}$ bu. per acre.

SPRING WHEAT RUBY

Earliest maturing, highest protein, smooth bearded spring wheat. Higher protein brings more money per bushel. Order at once for early planting.

1 bu. \$1.55; 5 bu. \$7.50; 10 bu. \$14.50

Bison Flax

NEW LOW-ACID CANE

A friend from Nebraska writes, "My cane is so heavy, that it is almost impossible to cut it."

Produces a mass of sweet, rich, succulent forage, more nutritious than corn silage. Cattle and sheep eat it right to the very root.

A new strain of Sorghum low in prussic acid; lessens danger of cattle and sheep poisoning.

The way the cattle and sheep go after it proves that they relish this cane, and the gains they are making on it go to prove that it has lots of feed value, too.

Our customers in Indiana and in Ohio plant it for bigger yields for silage.

It yields 25 to 50 per cent more than other varieties of cane.

10 lbs. 80c; 25 lbs. \$1.40; 50 lbs. \$2.25; 100 lbs. \$4.00, bags included

DAKOTA BLACK AMBER CANE

The earliest and best cane for the North. Grows from 5 to 7 feet tall and matures in 90 days. Stalks very sweet, slender and leafy.

10 lbs. 55c; 50 lbs. \$1.70; 100 lbs. \$3.00

SIXTY-DAY MILO

Grows the size of wheat and can be harvested with a binder, header or combine. It has yielded nearly 100 bushels of grain per acre. In dry years when wheat made two to four bushels this Sixty-day Milo made 35 to 40 bushels grain per acre. Distinctly superior to corn or barley in yield. Plant 6 to 8 pounds per acre in rows, using a cane plate and cultivate. A cattle and sheep feed for the western farmer.

10 lbs. 80c; 25 lbs. \$1.40; 50 lbs. \$2.25; 100 lbs. \$4.00

"Sam," himself, in a field of Low Acid CANE six weeks after planting

Zinnia

Sweet Pea

Snapdragon

GLADIOLUS

Extra Special Assortment of Large Bulbs—Mixed Colors
Contains 8 to 12 of our best varieties. 12 bulbs, postpaid to you, 80c; 25 bulbs, postpaid to you, \$1.50.

PEONIES

The immense fragrant blossoms put one in mind of oversized fully opened roses. As easy to plant as potatoes. Three assorted Peony roots, pink, red and white colors for \$1.15; six assorted Peonies for \$2.00, postpaid.

CLIMBING and RAMBLER ROSES

CLIMBING AMERICAN BEAUTY—(My pick.) Rich carmine; fragrant; early bloomer. Plants heavy two-year-old No. 1 stock. Each, 85c; 3 for \$2.25.

DOROTHY PERKINS—Clear shell pink with flowers borne in clusters; full and double. One of the finest of all climbing roses. Each, 85c; 3 for \$2.25.

CRIMSON RAMBLER—Extremely effective when grown on pillars and trellises. Flowers are produced from ground to tip, in large pyramidal clusters of 30 to 40. Each, 85c; 3 for \$2.25.

SIBERIAN HEDGE ROSES

Fragrant, large beautiful flowers, bloom from June until it freezes. Large bushy plants. Each, 40c; 5 for \$1.80; 10 for \$3.00; 25 for \$6.50.

BOBER'S DROUGHT RESISTANT DAHLIAS

Six choice sorts of many colors and shades for \$1.25, postpaid; 12 of these tubers for \$2.25, postpaid.

TARTARIAN BUSH HONEYSUCKLE

A Wonderful Importation from Russia

The upright or bush form of the Honeysuckle is noted for the great profusion and fragrance of its flowers. Growing from 8 to 12 feet high, they are extremely suitable for shrubby clusters and for individual planting purposes. Also very ornamental in a trained hedge, they will stand clipping to any desired shape. Mixed colors, 2 to 3 ft., each, 30c; 10, \$2.80; 50, \$12; 100, \$22. Prepaid.

Large select specimen plants for lawn plantings, 65c each; 3 for \$1.80; 6 for \$3.20.

LILACS

Prices: Common Purple, White or Persian, 50c each; 5 for \$2.00.

RED SNOWBERRY—A very hardy shrub which succeeds anywhere. Coral berries in autumn and winter. 2 to 3 feet, 45c each; 18 to 24 inches, each, 35c.

SPIREA VAN HOUTTEI or BRIDAL VEIL

Hardy everywhere. Large, 50c each; 3 for \$1.25; medium, 35c each; 3 for \$1.00.

CARAGANA or SIBERIAN PEA TREE

Valuable alike for trimmed hedge, shelter belt or ornamental shrub. Foliage resembles that of the locust, and a dainty yellow pea-like flower covers the plant in late May or June. 24 inches, 10 for 75c; 25 for \$1.75; 100 for \$5.00.

RUSSIAN OLIVE—The hardest of the Russian importations. It has small yellow flowers produced abundantly, replaced later by small silvery-white, olive-shaped fruits. When trimmed it makes a beautiful ornamental and when cut back forms a most effective hedge. 24 inches, each, 10c; 10 for 80c; 50, \$3.00; 100, \$5.00.

CHOKE CHERRY

This is one of the best of our ornamental fruit trees. Absolutely hardy anywhere. Always symmetrical, and when in full bloom is a great bank of snow with the added beauty of its nutty woodland fragrance, and later its rich, highly colored purplish-black fruit, grown for fruit jellies and possesses a distinct and pleasing flavor. 3 to 4 feet, 55c each; 5 for \$2.50.

NEW WAYZATA STRAWBERRY PLANTS

This all season strawberry, with the good qualities of the everbearing kinds, is a real money maker. Bearing season of at least three months. Tops the market for its appearance and quality. Here is the very best in Strawberry plants for your money. 25 plants, \$1.10; 50 plants, \$2.00; 100 plants, \$3.75.

PROGRESSIVE and GEM EVERBEARING STRAWBERRY PLANTS—\$2.00 per 100; **GOLDEN HARVEST**—\$1.50 per 100; **SENATOR DUNLAP**—One crop Strawberry plants, \$1.00 per 100.

SMALL FRUIT

LATHAM RASPBERRY PLANTS—10 for \$1.00; 25 for \$1.75; 100 for \$4.50.

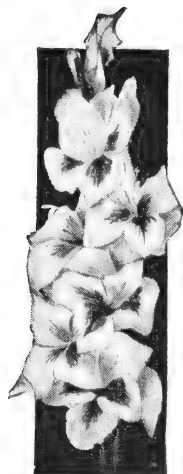

CARRIE GOOSEBERRY PLANTS—Each, 25c; 10 plants, \$2.00; 25 for \$4.50.

BETA GRAPES—Each, 25c; 5 plants, \$1.00; 10, \$1.75.

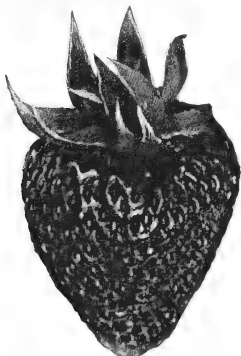

PERFECTION CURRANTS—Per plant, 40c; 5 for \$1.25; 10 for \$2.40.

VICTORIA RHUBARB—Large roots, \$1.00 per dozen.

WASHINGTON RUST PROOF ASPARAGUS PLANTS—Two year plants, 25 for 85c; \$3.00 per 100.

Gladiolus

New Wayzata

HARDY PEARS

MENDEL PEAR—Grown without winter protection. A Minnesota product, medium size, sweet and juicy, golden yellow color.

TAIT PEAR—Originated in Canada. Perfectly hardy, a good fruiter and of fine quality. Price, your choice of varieties, 3-4 ft., 85c each; 3 trees, \$2.35.

PROF. HANSEN'S MOST FAMOUS PLUMS

For Quickest Return in Fruit

WANETA PLUM—The giant of hardy plums. Up to two inches in diameter. Highly flavored. Richly colored red skin.

TECUMSEH—The most consistent yielder of quality plums. Best record in drought years.

OPATA CHERRY-PLUM—Earliest of all plums. The flesh is a light green color with a purplish red skin. Very productive.

SAPA CHERRY-PLUM—Early, large, productive and hardy. Black purplish flesh is extra fine for eating and wonderful for preserves and jam.

HANSKA PLUM—The superb plum of apricot flavor and fragrance. Very hardy and productive. Highly colored and firm flesh.

EARLY RICHMOND—The earliest of the sour pie cherries. Fruit dark red, medium in size. Tree vigorous and bears young. Does best on upland or sandy soil which is well drained.

OKA CHERRY—Not really a cherry but is a good substitute for a cherry. It is a sand cherry hybrid, a seedling of Champa. Color brighter than Sapa and a black red flesh.

ADAPTED EARLY MATURING APPLES

PROF. HANSEN'S ANOKA APPLE—The wonder Apple, as it usually bears the second year after planting. Very hardy everywhere. Good eating and a heavy producer.

WEALTHY APPLE—The most popular of all early fall apples. Large, bright red, very sweet and fine.

YELLOW TRANSPARENT—Early variety, ripening to a yellow in August. Good eating, being tender and juicy when ripe.

DUCHESSE—Old standard hardy summer variety. Large apple streaked with red. Ripens the first of September.

RED BIRD or CRIMSON BEAUTY—Early apple of bright red color and very attractive. Good quality and flavor. Originated in Canada.

McINTOSH RED—Fruit medium to small in size, beautiful crimson. High quality for marketing and home use. Keeps until mid-winter or later.

DOLGO CRAB—Originated at South Dakota Experiment Station. Tree hardy, vigorous, upright grower. Fruit medium to small, rich in flavor, bright red color. Fine for pickling or jelly.

WHITNEY CRAB—August to September. The fruit is very large and glossy green, striped with red. The flesh is firm, juicy and pleasant. It is a very heavy yielder and highly prized for cider. Nearly the size of an apple.

PRICES ON APPLES, CRABS AND PLUMS

OUR GRASS SEEDS PRODUCE WONDERFUL LAWNS

RICHGREEN LAWN SEED

Hormone Treated seed will increase germination, root and plant growth, doubling results of untreated seed and also increase drought resistance of your lawn. The very best value in Lawn Grass seed in America.

**1 lb. 60c; 3 lbs. \$1.50; 5 lbs. \$2.40,
Postpaid.**

Practical Drought-Resistant LAWN GRASS For dry climate regions where water for lawns is not available

BUFFALO GRASS

Makes Wonderful Lawns in Dry Countries

In the lighter sandier soils, and the dry and semi-dry regions Buffalo Grass has proven highly desirable for lawn use. It is a low growing plant, seldom getting over 6 inches in height; hence needs no cutting and requires very little care. Our seed is treated and scarified to make it grow quicker. Work the seed well into the top soil, water well and roll it in. Since it is spread from underground root stocks, as well as from seed, once you get a thin stand established, it thickens up all by itself.

**¼ lb. 65c; ½ lb. \$1.20
One pound covers 3,000 square feet. \$2.00 prepaid**

BLUE GRAMA GRASS

Resembles Buffalo grass. A short curly beautiful light green grass. Once established will last a lifetime. Requires no attention at all. Hardly gets tall enough to mow. This seed is best planted in April, at the rate of 1 pound for 500 square feet.

Prepaid price: 1 lb. 50c

FAIRWAY STRAIN OF CANADIAN CRESTED WHEATGRASS

A very hardy, leafy grass easy to start if planted real early in the spring because it germinates better in cool, moist weather. Plant at the rate of one pound to 300 square feet.

Price: 40c per lb.

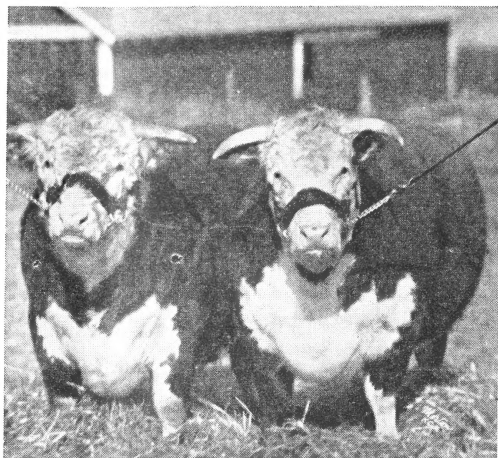

BOBER'S 30-DAY LAWN GRASS

For a Beautiful Lawn All Season

Order Bober's "30-Day Lawn Grass" early and sow it as soon as the snow melts away in early spring. Sow one pound to 250 square feet and you will have a well established lawn by early summer. This mixture consists of fine leaved and deep rooted perennial grasses which assures a beautiful rich green lawn thick and free from weeds.

One lb. 45c; 3 lbs. \$1.25; 5 lbs. \$1.95; 10 lbs. \$3.50, postpaid

Two of Mr. Bones' yearling Herefords from his Prize Winning Herd

Mr. Bones with an armful of Cossack Alfalfa

One thousand acres of the five thousand acre Bones' Stock Farm, Parker, S. D., are planted with our alfalfa seed. Part of the rest of the acreage is planted with our pasture grass seed. The six hundred registered Herefords on this farm are outstanding for their excellent quality and uniformity, as is evidenced by the many blue ribbons awarded by International Livestock Exposition. Many of the leading herds in the country add to their selection by buying from this herd. Two yearling Herefords, shown to the left above, show the results of breeding, selection, study, good feeding.

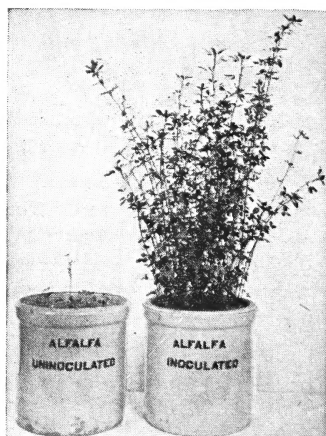

We urge all our customers to order seed very early this year. Many items in garden seed and in field seeds will be scarce and higher priced. Shipments by freight will go through quicker if shipped early.

SHEEPMEN ATTENTION

Rambouillet Rams from our own flock for sale. Quality yearlings, pure-bred, big boned, grained and ready for service. Prices reasonable.

Wool Bags—Bemis 7½ ft. 4 lb. wool bags \$1.10 each. Add postage.
